

SPRINT - 1

1. Creating IBM Watson IOT Platform and device:

2. Creating Node-red service

3. Creating a Database in Cloudant DB:

The screenshot displays the Cloudant Databases management interface. At the top, there's a header with the title 'Databases', a search bar labeled 'Database name', and buttons for 'Create Database', 'JSON', and a notification bell. Below the header, the section 'Your Databases' contains a table listing the existing databases. The table has five columns: 'Name', 'Size', '# of Docs', 'Partitioned', and 'Actions'. Three databases are listed: 'medicine' (432 bytes, 24 docs, not partitioned), 'noderedniju20221109' (34.5 KB, 4 docs, not partitioned), and 'sample' (14 bytes, 1 doc, not partitioned). Each database row has three action icons: a plus sign, a lock, and a trash can. At the bottom of the table area, it says 'Showing 1-3 of 3 databases. Databases per page 20'. The bottom of the image shows a Windows taskbar with various application icons, a search bar, and system information including '28°C Partly sunny' and the date '16-11-2022'.

Name	Size	# of Docs	Partitioned	Actions
medicine	432 bytes	24	No	  
noderedniju20221109	34.5 KB	4	No	  
sample	14 bytes	1	No
